Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 24 February 2004 has been entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings were received on 24 February 2004. These drawings are accepted by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 11-12, and 14-17 rejected under 35 U.S.C. 103(a) as being unpatentable over Graef et al. (6,518,479) in view of Rezai et al. (5,713,881).

With respect to claims 1, 5, 14, 15, and 17, Graef discloses all aspects of the claimed invention with the exception of regenerated cellulose. Graef discloses an absorbent structure, as shown in figure 3, comprising a foam material which comprises two integrated layers 10 and 30, the layers being formed by placing one on top of the other before they are completely dry, as described in column 18, lines 1-33. The layers partially penetrate each other such that there is no clear partitioning between the layers, as described in column 6, lines 38-44. The layers have different pore sizes, as described in column 5, line 67 to column 6, line 3. The absorbent structure comprises cellulose, as described in column 7, line 38 to column 8, line 63.

Rezai discloses the use of regenerated rayon cellulose, or viscose, in an absorbent article, and further discloses compression of the cellulose, in order to provide a higher liquid wicking rate, as described in column 21, lines 18-25.

It would have been obvious to one of ordinary skill in the art at the time of invention to make the cellulose material of Graef compressed regenerated viscose cellulose, as taught by Rezai, to provide a higher liquid wicking rate.

With respect to claim 2, the foam material also contains superabsorbent materials, as disclosed in column 8, lines 64-66.

With respect to claim 3, each layer comprises a different amount of superabsorbent material, as disclosed in column 6, lines 15-17.

With respect to claim 4, the layer that has the smallest pore size, as disclosed in column 5, line 65 to column 6, line 1, has the highest amount of superabsorbent material, as disclosed in column 6, lines 15-17.

With respect to claim 6, the foam material of the layers comprises different polymers, as disclosed in column 18, lines 14-17.

With respect to claim 11, Graef discloses an absorbent article comprising a liquid permeable topsheet 16, a liquid impermeable backsheet 18, and an absorbent structure therebetween, as shown in figure 7.

With respect to claims 12 and 16, the absorbent article is a diaper, sanitary napkin, or incontinence guard, as disclosed in column 15, lines 9-13.

Response to Arguments

Applicant's arguments with respect to claims 1-6, 11-12, and 14-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Lynne Anderson whose telephone number is (703) 306-5716. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (703) 305-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
